

LAUNCH OF INTEGRATED PLATFORM AND WEBSITE

Mario Grosso

European Network of Environmental Professionals

ENEP General Assembly, Barcelona, 16-17 April 2015

Recap...

- A complete renewal of the current system, fully integrated within the ENEP website
- A single login for the website (Drupal) and the Expert Platform
- All current data compiled by nearly 2500 Individual Users were safeguarded
- No changes for the National Secretariats operation
- A total cost in the order of 4.000 €
- Yearly hosting + maintenance cost will be 1.300 €
- Extensive testing was carried out in recent months, and users registered in both systems were aligned

Access to ENEP is **free for all ENEP individual members**.

Access is allowed to **Private and Public Organizations** as well. To know more about conditions, please contact the **ENEP Secretariat**.

Simply click "Register now", fill your personal details and wait for the Secretariat to process the request.

The **ENEP** Platform is intended to provide a knowledge base and an information interchange tool between Environmental Professionals, Public Institutions and Private Organizations searching for personnel and expertise

The screenshot shows the ENEP website's registration page. At the top, the ENEP logo and tagline 'European Network of Environmental Professionals' are visible. Below the navigation bar, there are tabs for 'For individuals' and 'For organizations'. The main heading is 'New individual user registration'. A red circle highlights the 'Import LinkedIn Profile' button. The registration form includes fields for 'First name?', 'Family name?', 'Birth City?', 'Birth Country?' (with a dropdown menu), 'Birth date?' (with year, month, and day dropdowns), and 'Affiliated to?' (with a dropdown menu). A note at the bottom of the form asks for a '*Membership card no.?'. On the left side, there is a 'Main Menu' with links for Home, Search, Register, Tools, F. A. Q., Contacts, Secretariat, and Webmaster.

-
- Future perspectives**
- The more appealing layout and website integration should encourage existing Users to review and update their profile
 - New Users should be encouraged to register thanks to the possibility to import their LinkedIn profile
 - Companies currently registered (for free...) will be encouraged to support ENEP via one of the proposed sponsoring packages
- Marketing is the key,
at both ENEP and MA level!**

Future perspectives

Possible developments, included within the current budget:

API TOOLS

- a set of API to allow associations to interact with ENEP users database
- API can be used to add / delete / enable / suspend users and can be integrated easily with any associations websites
- "restful" technology

ENEP WIDGET

- ajax widget to display ENEP's latest news on the websites of the national associations, easy to insert (few lines of html code)
