

ENEP General Assembly and Side-Events 6-7 October 2011, 's-Hertogenbosch (Den Bosch), Netherlands

SIDE EVENT INFORMATION – THURSDAY 6 OCTOBER 2011

10:00-12:00 – Milieubeurs (Environment Exhibition)

Together with VLM and Libéma, VVM is organising the Environment Exhibition again, the largest of its kind in the Netherlands, with over 140 exhibitors with technical solutions, consulting firms and experts. For the VVM, the integrated approach is important, with information and discussions on current environmental issues besides technical solutions. VVM has a stand near the entrance of the exhibition, and will be happy to show ENEP members around. More information on www.milieuvakbeurs.nl (English information will be uploaded shortly).

12:30-15:30 – Urban climate change adaptation

It is expected that cities will increasingly face the impacts of climate change. Urban vulnerability will therefore be affected by the way that adaptation strategies are taken into account by urban policies and practical implementation of appropriate adaptation measures, both technically and spatially. The ENEP Working Group Climate Proof Cities is organising an international meeting with invited, high-level experts on urban climate change and adaptation policies. More information on <http://www.vvm.info/?pid=main&id=637>.

16:00-22:00 – 25th Anniversary VVM

In 1986, VVM (Association of Environmental Professionals) was born. On 6 October 2011, they will celebrate VVM's 25th anniversary with a great party, starting at 16:00 in the Brabanthallen. For the festivities they have chosen a theme which is open, diverse, connecting and inspiring: Life. A theme closely connected to our core business, the environment.

Instead of a separate dinner, ENEP guests will receive vouchers with which they can purchase food and drinks during the party.

All of the General Assembly and associated Side Events will take place at:
Brabanthallen, Diezekade 2, 5222 AK, 's-Hertogenbosch (Den Bosch), Netherlands

Our hosts in the Netherlands.
