SIDE-EVENT PROGRAMME

Industrial Emissions Directive: Towards a Greener Industry

6th September 2012

Provincie Vlaams-Brabant, Provincieplein 1, 3010 Leuven

The largest industrial installations account for a considerable share of total emissions of key atmospheric pollutants and also have other important environmental impacts, including emissions to water and soil, generation of waste and the use of energy. Therefore, the European Commission has implemented the IED (Industrial Emissions Directive). VMx (the association of the Flemish environmental professionals) and ENEP organize an international seminar on the implementation of this directive. The main goal is to increase the emission of industrial pollution in an economical and sustainable manner.

13:00	Welcome
13:30	Introduction by Filip Raymaekers, chairman of VMx
13:40	Vision on a sustainable industrial future, Filip Francois (EU DG Environment) (TBC)
14:30	Legal impact of the IED for environmental professionals (Isabelle Larmuseau, LDR lawyers)
15:15	Break
15:30	The Flemish implementation of the IED, Jan Baeten (LNE, environmental permits)
16:15	Integration of new BREF's in an industrial environment (TBC)
17:00	End of the seminar

The venue is directly next to the Leuven Train Station, which is a 23 minute train journey from Brussels Central Station. You can check train times at: <http://www.b-rail.be/main/E//>
