

## Update on ENEP

**Prague, June 1<sup>st</sup>, 2007**

ENEP Task Force:  
Mario Grosso, Emanuele Regalini (AIAT)

## Summary

1. Current situation
2. Level 2 Advanced
3. Financial aspects
4. Marketing campaign

## Current situation

- A new name → ENEP
- A new domain → www.environmentalprofessionals.eu
- Secretariats are fully operational
- More than 200 subscribers
- Positive feedback from the Secretariats and from the users

A new step of technical development currently under operation  
(approved by the ExCo on March 2007)

Level 2 Advanced

3

## Level 2 advanced

“**Level 2 Advanced**” includes most of the features of the foreseen Level 3, including some requests derived from the testing phase. The most important are:

- graphical improvement (including the substitution of DBEP with ENEP)
- more detailed information to the new subscribers, including the disclaimers
- improvement of the layout of the CV report (both HTML and PDF)
- on-line messaging feature (to be able to contact, anonymously, an anonymous profile)
- for the Central Secretariat: possibility to send communications to all the subscribers (very important to help them feel the ENEP “alive and kicking”)
- several minor modifications
- etc.

4

## New graphical layout

The access to the ENEP is **free for all the members of the Associations who are part of the EFAEP**. Simply click the Register button above, fill in your personal data or the data of your Organization, and your application will be processed.

ENEP is a very recent and up-to-date European Network of Environmental Professionals developed by EFAEP, the European Federation of Associations of Environmental Professionals. It is intended to provide a knowledge base and an information interchange tool between Environmental Professionals, Public Institutions and Private companies searching for personnel.

- Environmental Professionals** can use the ENEP to look for state-of-the-art information on some specific environmental issues, or they can upload their personal data on the ENEP and be found by other Professionals, by companies or by Public Bodies who are interested in their expertise.
- Companies of the Environmental Sector** can use the ENEP to recruit new personnel or to search the expertise they need for a particular task.
- Public Authorities** can use the ENEP to find an Environmental Professional who can support them in the drafting of new legislation or who can give them technical advice.

**The privacy disclaimers**

Text of the disclaimer included at the end of each email sent by the ENEP system:

This communication is confidential and intended for the addressee only. Any form of unauthorized use, publication, reproduction, copying or disclosure of the content of this e-mail is not permitted. If you are not the intended recipient of this message and its contents, please notify the European Federation of Associations of Environmental Professionals (enep@efaep.org) immediately and delete this message. Thank you.

8

Text of the disclaimer included at the end of each CV generated by ENEP in PDF format:

DISCLAIMER - ENEP is a service provided by EFAEP, the European Federation of Association of Environmental Professionals. Information contained in this document is provided by EFAEP 'as it is', without any warranty or verification about its veridicity: the person to whom information is related is to be held as the only responsible for its correctness.

### 1. LEVEL 1 + 2

- **FORESEEN:** 7.500 euros +/- 20% (uncertainty) + VAT
- **ACTUALLY SPENT:** 7.700 euros TOTAL

### 2. LEVEL 3

- **FORESEEN:** 5.000 euros +/- 20% (uncertainty) + VAT

### 3. LEVEL 2 ADVANCED

- **ACTUAL COST:** 4.000 euros + VAT

Level2Adv will be completed by the end of July, 2007

## Future steps

- Level 3 (actually Level 3 – Level 2 Adv) to be defined, but only based on the actual success of ENEP
- **A strong marketing campaign to promote ENEP**
- How to make money from ENEP for both EFAEP and the Association members?

11

## Marketing campaign

A proposal from the dedicated working group that was established in Bergamo (June, 2006):

1. An "official 1 page advertisement " is already available and should be published in English on the associations' newsletters **[within Summer 07]**.
2. Write a brand new and more extensive paper, to be published in newsletters or bulletins of all member associations; this should be intended to give not only the general information about the system but also some operational details for the users **[English version: September 07; translations in all other languages: October-November 07; publication: end of 2007]**.

12

3. publish a translated version of the "official 1 page advertisement" on any newspaper or scientific-technical magazine EFAEP member associations have free or costly access to [In January 2008]. This should then correspond to the official opening to the public of ENEP
4. a second and more extended version of the paper prepared in step 2 could also work as an "informal manual" to be distributed among all our members to help them using the system.

### Official "1 page advertisement"

[www.environmentalprofessionals.eu](http://www.environmentalprofessionals.eu)

ENEP is the European electronic Network of Environmental Professionals. It is a web portal set up by EFAEP (European Federation of Associations of Environmental Professionals), where its members can record their contact and professional details and where both members of EFAEP and non-members can search for environmental professionals.

The two main aims of ENEP are:  
1. to facilitate active communication and exchange of knowledge between EFAEP members, and  
2. to provide access to the expertise and experience of environmental professionals at the European level.

This will also give the environmental professionals of Europe a platform where they can present their professional profiles, where they can get in touch with each other, and where clients and service providers can meet.

EFAEP is an association of environmental professionals from all over Europe and was founded in 2002 in response to the increasingly important and diverse role of environmental professionals. The restoration, protection and enhancement of the environment is no longer a secondary phenomenon but has penetrated all areas of life. In response to the growing sensitivity of society to environmental issues, the activities of environmental professionals have been steadily growing over the past decades and have become an unquestionable necessity.

EFAEP brings together professionals who are working in the field of the environment all over Europe and gives them an opportunity to exchange their experiences from their home countries, to find common solutions and to learn from successes and failures made in the current and future member countries of the European Union.

ENEP is the unique web tool EFAEP uses to connect its more than 15,000 members. It is currently the only internet site in Europe letting environmental professionals thoroughly describe their own experience and capabilities, effectively classify their skills, and quote their papers and projects in order to build a really complete profile.
